

COMPANY POLICY STATEMENT CLIMATE CHANGE

2024

Vistry Group PLC recognises the urgent need to reduce greenhouse gas emissions to avoid the worst impacts of climate change.

We acknowledge the need to mitigate climate change risks associated with the homes and communities we build, whilst at the same time reducing the greenhouse gas emissions associated with our operations. Therefore, we will:

- Reduce greenhouse gas emissions across all scopes and in line with the criteria and recommendations of the Science Based Targets initiative
- Monitor, measure and report our greenhouse gas emissions and report our progress in our annual report and on our website in line with global standards, such as the Greenhouse Gas Protocol
- Comply with legislation that supports climate change adaptation and mitigation, such as building regulations and the Task Force on Climate Related Financial Disclosure (TCFD) and provide our expertise in the development of climate change legislation relevant to our Group
- Understand the expectations of our stakeholders in relation to climate change and ensure our approach meets their expectations
- Work towards procurement of 100% renewable electricity in our sites and offices
- Engage with our supply chain to ensure a collaborative approach to tackling climate change adaptation and mitigation on our projects and within our sector
- Be an active member of industry organisations, such as the Supply Chain Sustainability School and Future Homes Hub
- Identify and manage the risks and opportunities associated with climate change, in terms of impact on our Group as well as the impact on the homes and communities we build, including flooding and overheating
- Engage with our customers to increase their understanding of new technology within their homes
- Responsibility for climate related issues resides with Executive Leadership Team (ELT) and our Chief Operating Officer is the executive sponsor.

Greg Fitzgerald
