

# Independent Limited Assurance Report

## to the Directors of Vistry Group plc

Vistry Group plc (“Vistry”) commissioned DNV Business Assurance Services UK Limited (“DNV”, “us” or “we”) to conduct a limited assurance engagement over Selected Information presented in the Restated 2021 baseline of the Sustainability Report 2021, for the year ended 31 December 2021.

**Our Conclusion:** Based on the procedures we have performed and the evidence we have obtained, nothing has come to our attention that causes us to believe that the Selected Information is not fairly stated and has not been prepared, in all material respects, in accordance with the Criteria.

This conclusion relates only to the Selected Information, and is to be read in the context of this Independent Limited Assurance Report, in particular the inherent limitations explained overleaf.

Our observations and areas for improvement will be raised in a separate report to Vistry Management. Selected observations are provided below. These observations do not affect our conclusion set out above.

- Vistry estimated the Electricity and Gas consumption for a number of their construction business units. To improve the accuracy of the reported data, we advise that all business units collect and report actual data on a monthly or quarterly basis.
- We observed that there is an overall understanding of the reporting methodology among stakeholders involved in the reporting process. However, going forward we recommend that Vistry formally document the data collection process for all complex areas to help ensure continuity and consistency in reporting.
- We noted that Vistry manually consolidates data from a variety of sources. We recommend introducing automated processes and digital-based solutions to reduce the risk of errors in the data collection process. A dual-sign off and review of environmental data prior to the assurance data would also improve Vistry’s reporting controls.
- We observed that consumption data for minor fuel sources was not collected and reported during the period. We recommend that Vistry collects all fuel data to improve the completeness of reported Scope 1 GHG emissions.

### Selected information

The scope and boundary of our work is restricted to the indicators listed below and included in the Restated 2021 baseline of the Sustainability Report for the 2021 reporting year (the “Selected Information”), listed below:

- Scope 1 GHG emissions (Natural Gas, Directly Purchased Fuels & Company Fleet): 14,911 tCO<sub>2</sub>e
- Scope 2 GHG emissions (Purchased Electricity - Location Based): 2,774 tCO<sub>2</sub>e
- Scope 3 GHG emissions (Category 6: Business travel - Road and Rail): 255 tCO<sub>2</sub>e
- Number of Additional Affordable homes completed: 744

To assess the Selected Information, which includes an assessment of the risk of material misstatement in the Report, we have used the Vistry Basis of Reporting (the “Criteria”), which can be found [here](#).

We have not performed any work, and do not express any conclusion, on any other information that may be published in the Report or on the Vistry website for the current reporting period or for previous periods.

### Our competence, independence and quality control

DNV established policies and procedures are designed to ensure that DNV, its personnel and, where applicable, others are subject to independence requirements (including personnel of other entities of DNV) and maintain independence where required by relevant ethical requirements. This engagement work was carried out by an independent team of sustainability assurance professionals. Our multi-disciplinary team consisted of professionals with a combination of environmental and sustainability assurance experience.

### DNV Business Assurance

DNV Business Assurance Services UK Limited is part of DNV – Business Assurance, a global provider of certification, verification, assessment and training services, helping customers to build sustainable business performance.

## Standard and level of assurance

We performed a **limited** assurance engagement in accordance with the International Standard on Assurance Engagements (ISAE) 3000 revised – ‘Assurance Engagements other than Audits and Reviews of Historical Financial Information’ (revised), issued by the International Auditing and Assurance Standards Board. This standard requires that we comply with ethical requirements and plan and perform the assurance engagement to obtain limited assurance.

DNV applies its own management standards and compliance policies for quality control, in accordance with ISO/IEC 17021-1:2015 - Conformity Assessment Requirements for bodies providing audit and certification of management systems, and accordingly maintains a comprehensive system of quality control including documented policies and procedures regarding compliance with ethical requirements, professional standards and applicable legal and regulatory requirements.

The procedures performed in a limited assurance engagement vary in nature and timing from, and are less in extent than for, a reasonable assurance engagement; and the level of assurance obtained is substantially lower than the assurance that would have been obtained had a reasonable assurance engagement been performed. We planned and performed our work to obtain the evidence we considered sufficient to provide a basis for our opinion, so that the risk of this conclusion being in error is reduced but not reduced to very low.

## Basis of our conclusion

We are required to plan and perform our work in order to consider the risk of material misstatement of the Selected Information; our work included, but was not restricted to:

- Conducting interviews with Vistry management and data owners to obtain an understanding of the key processes, systems and controls in place to generate, aggregate and report the Selected Information;
- Performing limited substantive testing on a selective basis of the Selected Information to check that data had been appropriately measured, recorded, collated and reported;
- Reviewing that the evidence, measurements and their scope provided to us by Vistry for the Selected Information is prepared in line with the Criteria;
- Assessing the appropriateness of the Criteria for the Selected Information; and
- Reading the Report and narrative accompanying the Selected Information within it with regard to the Criteria.

## Inherent limitations

All assurance engagements are subject to inherent limitations as selective testing (sampling) may not detect errors, fraud or other irregularities. Non-financial data may be subject to greater inherent uncertainty than financial data, given the nature and methods used for calculating, estimating and determining such data. The selection of different, but acceptable, measurement techniques may result in different quantifications between different entities. Our assurance relies on the premise that the data and information provided to us by Vistry have been provided in good faith. DNV expressly disclaims any liability or co-responsibility for any decision a person or an entity may make based on this Independent Limited Assurance Report.

## Responsibilities of the Directors of Vistry and DNV

The Directors of Vistry have sole responsibility for:

- Preparing and presenting the Selected information in accordance with the Criteria;
- Designing, implementing and maintaining effective internal controls over the information and data, resulting in the preparation of the Selected Information that is free from material misstatements;
- Measuring and reporting the Selected Information based on their established Criteria; and
- Contents and statements contained within the Report and the Criteria.

Our responsibility is to plan and perform our work to obtain limited assurance about whether the Selected Information has been prepared in accordance with the Criteria and to report to Vistry in the form of an independent limited assurance conclusion, based on the work performed and the evidence obtained. We have not been responsible for the preparation of the content on Vistry’s website.
